• *Staphylococcus aureus* (Staph aureus)

Figure 1 consists of two line graphs. The left graph plots 'Rate of reaction' on the y-axis against 'Temperature / °C' on the x-axis. The curve starts at a low rate at 10°C, rises to a peak at 30°C, and then falls at 40°C. The right graph plots 'Rate of reaction' on the y-axis against 'Temperature / °C' on the x-axis. The curve shows a steady, exponential increase in the rate of reaction as temperature rises from 10°C to 40°C.
